Working Drawing Cafe with Residence

Working drawing deals with system drawings and their co-ordination with each other for a single project.

The type of drawing includes centre line, architectural intervention layout, interior element layout, ceiling, flooring and electrical layout.

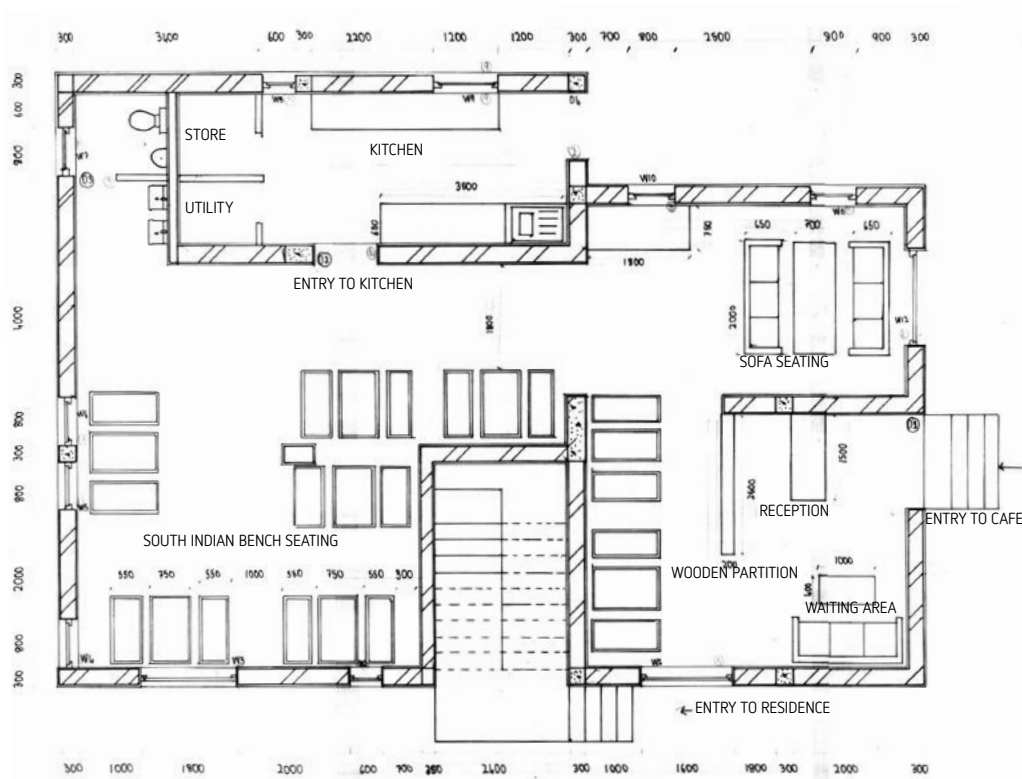

We detailed out every furniture elements details and other significant area details

I learned that each system within a designed interior environment needs to be well co-ordinated to function properly together

Corporate office

-for cnn news

CONCEPT

The design intent for the Cnn office was to create as much connectivity between all users of the space. Cnn connects people with the world. The goal was to create the office as its own community inspired by the characteristics of the Media channel i have tried to create the connectivity in the design overall. Creating connectivity with all the workers through the design was a taken as a challenge while designing this space. so that the works make easy as the communication makes easy

03 Retail studio

-for sketchers

The aim for the project is to design a sketchers exclusive store through a concept by studying the brand characters and the products.

Concept Bold in to the design

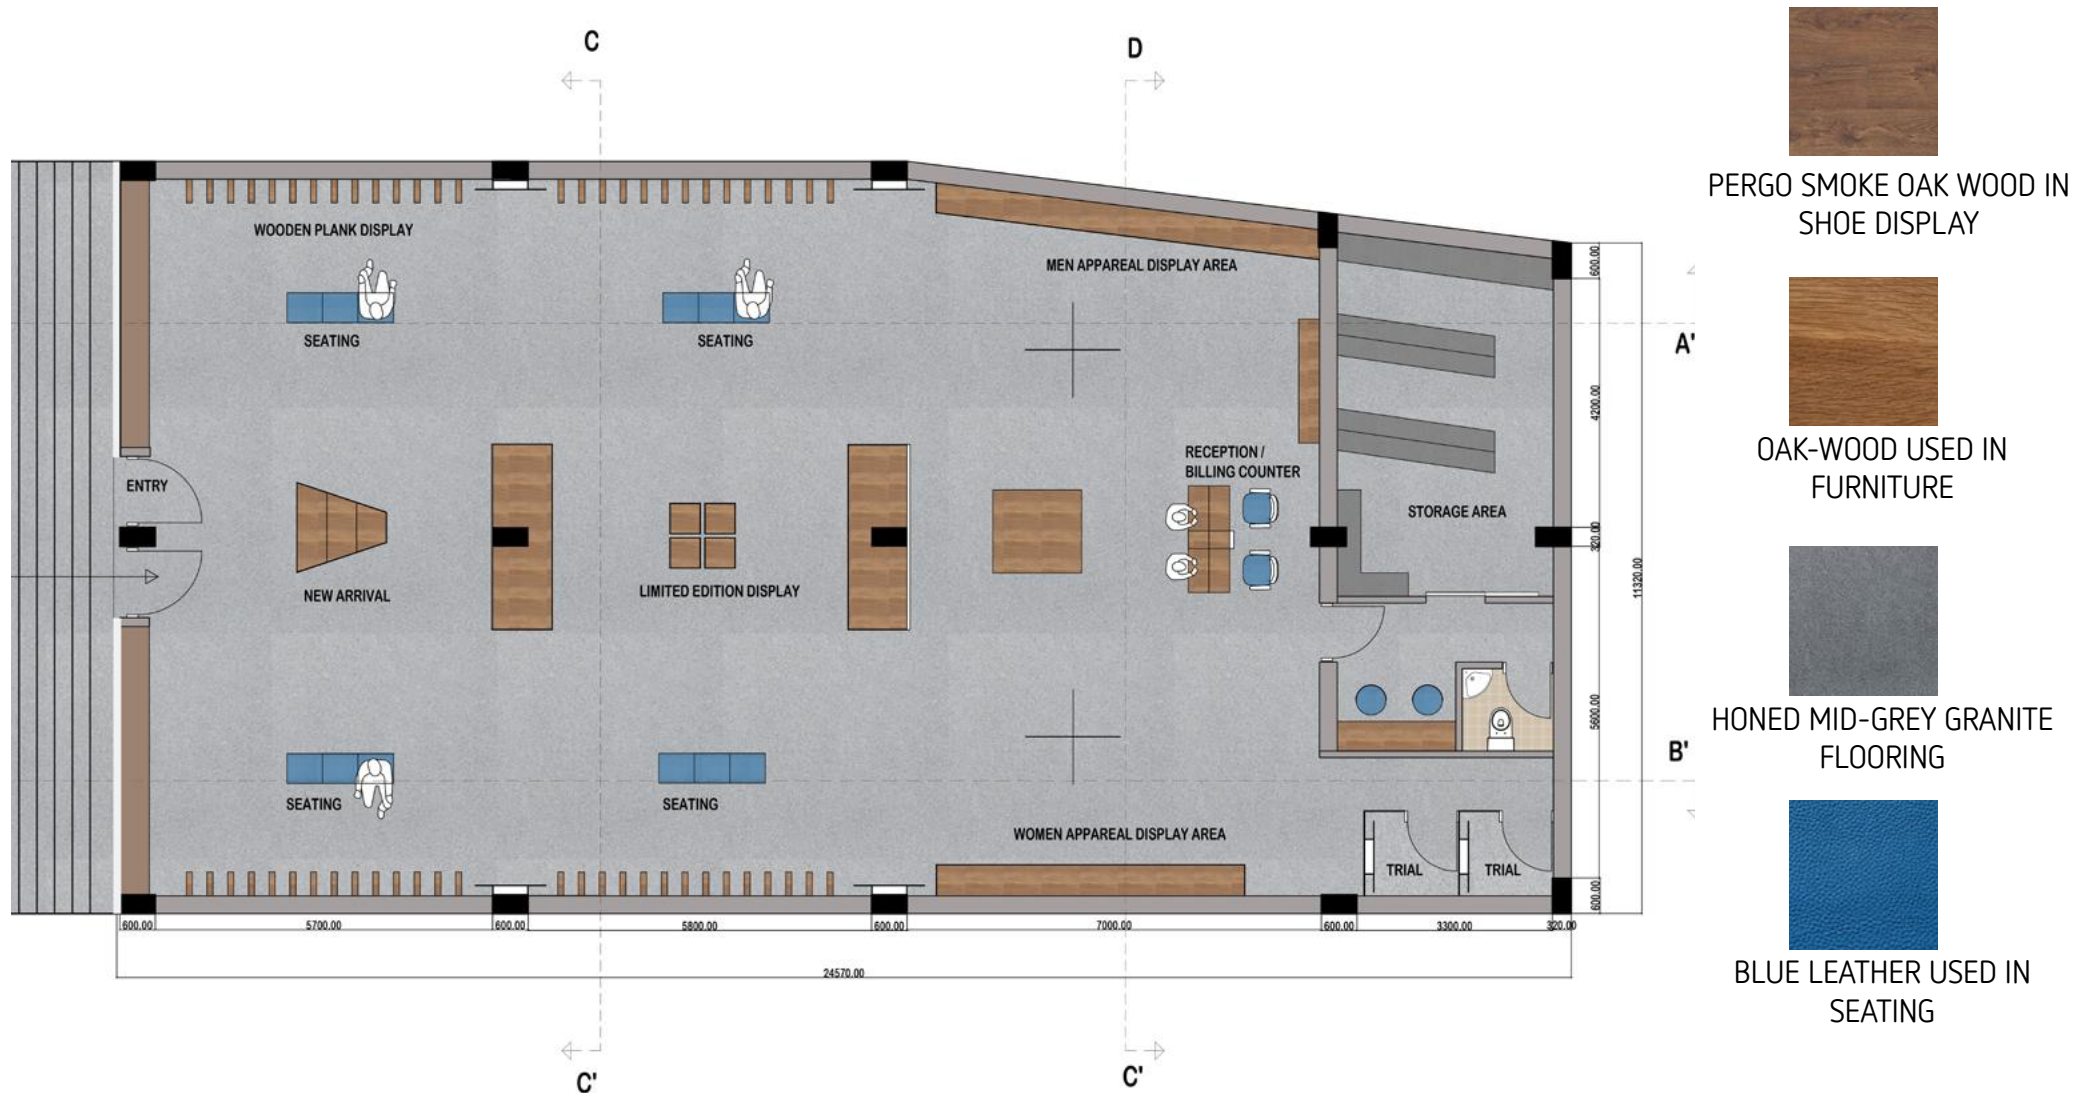

The design intent for the Sketchers comes from the characters of the brand. The characters of the products that they sell. While looking in to their products we can see a bold design or a bold colours in their products. They always tries to keep the brand name and they dont compromise on their products quality design. They have a variety of products

04 Weekend House

-Theme - Contemporary

This space planning studio focused on designing a weekend house as in basis of a theme that we can select. The site for this project was in v.v nagar, anand

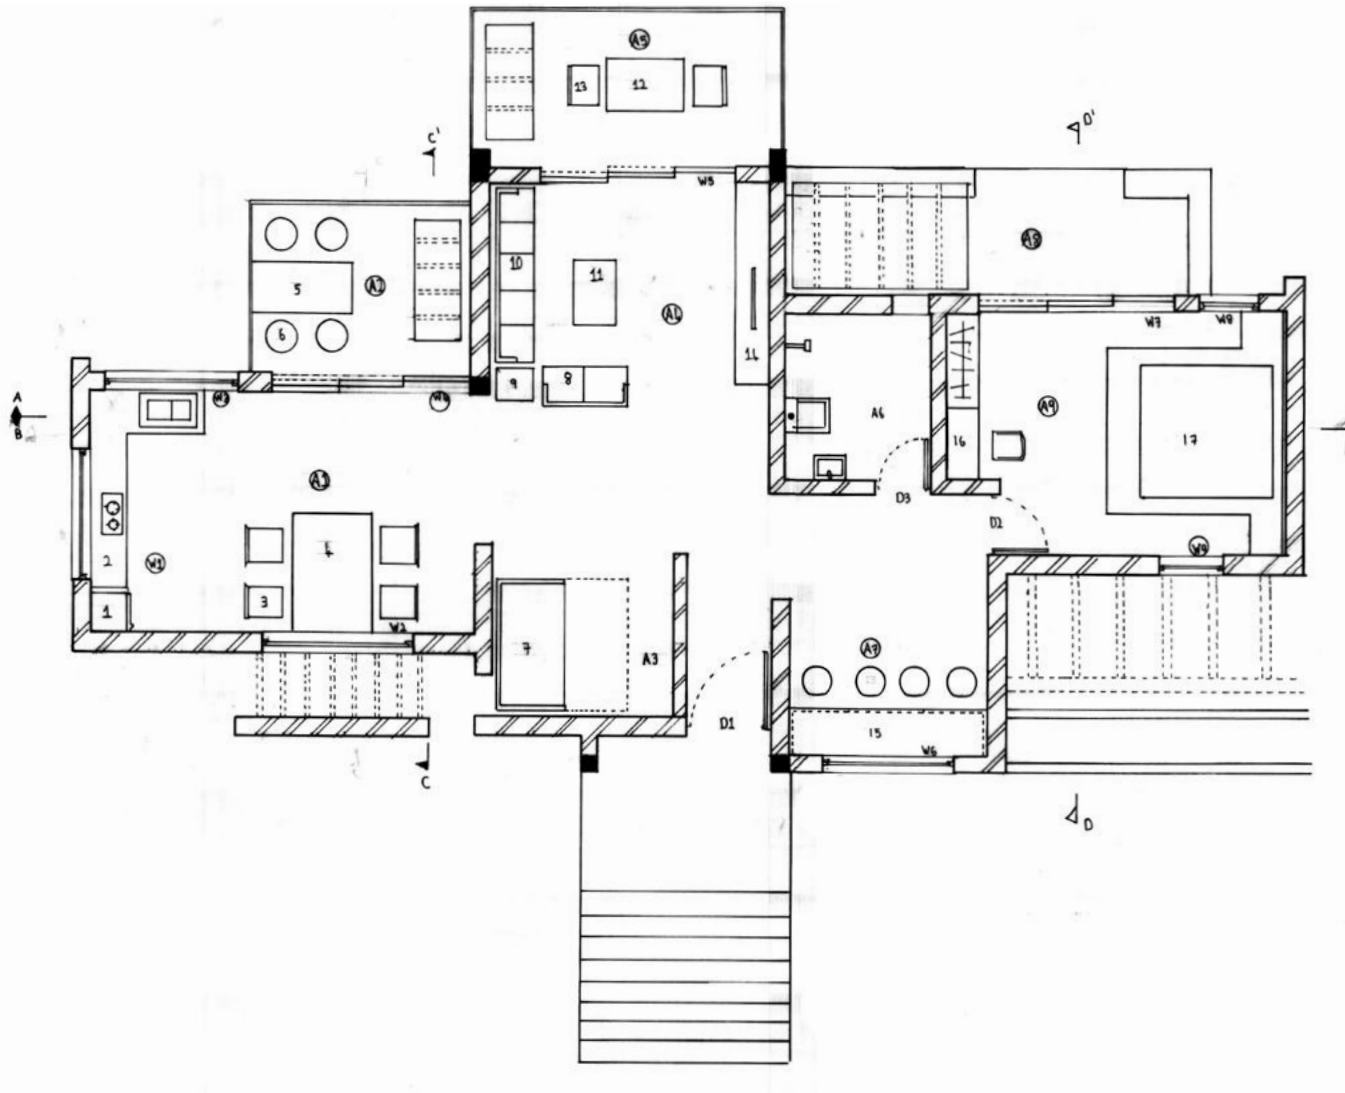

Designing an interior space with a theme that was the main focus of this studio the spaces should reflect the theme that has been selected

a. Plan

Contemporary theme based weekend house

The design was designed through a contemporary style
contemporary means "off the moment"
I tried to make out the contemporary style through, neutral colours, minimalism and clean furnitures
Focusing on functions over forms, however the two have been taken equal priorities

LEGENT

W1	2000*1200
W2	2300*1200
W3	2000*1200
W4	3000*2100
W5	3000*2100
W6	2000*1200
W7	3000*2100
W8	900*1200
W9	1000*1200
D1	1300*2100
D2	1000*2100
D3	900*2100

Contemporary theme based weekend house

SECTION AA

-Sticks to Neutral

Neutral lights has been used throughout the design, black, white tans, grey and blue colours are mostly used in the design

Furniture

Clean lines and smooth surface without any carving furniture is made of light coloured woods such as maple and birch

SECTION BB

SECTION CC

SECTION DD

-Lighting

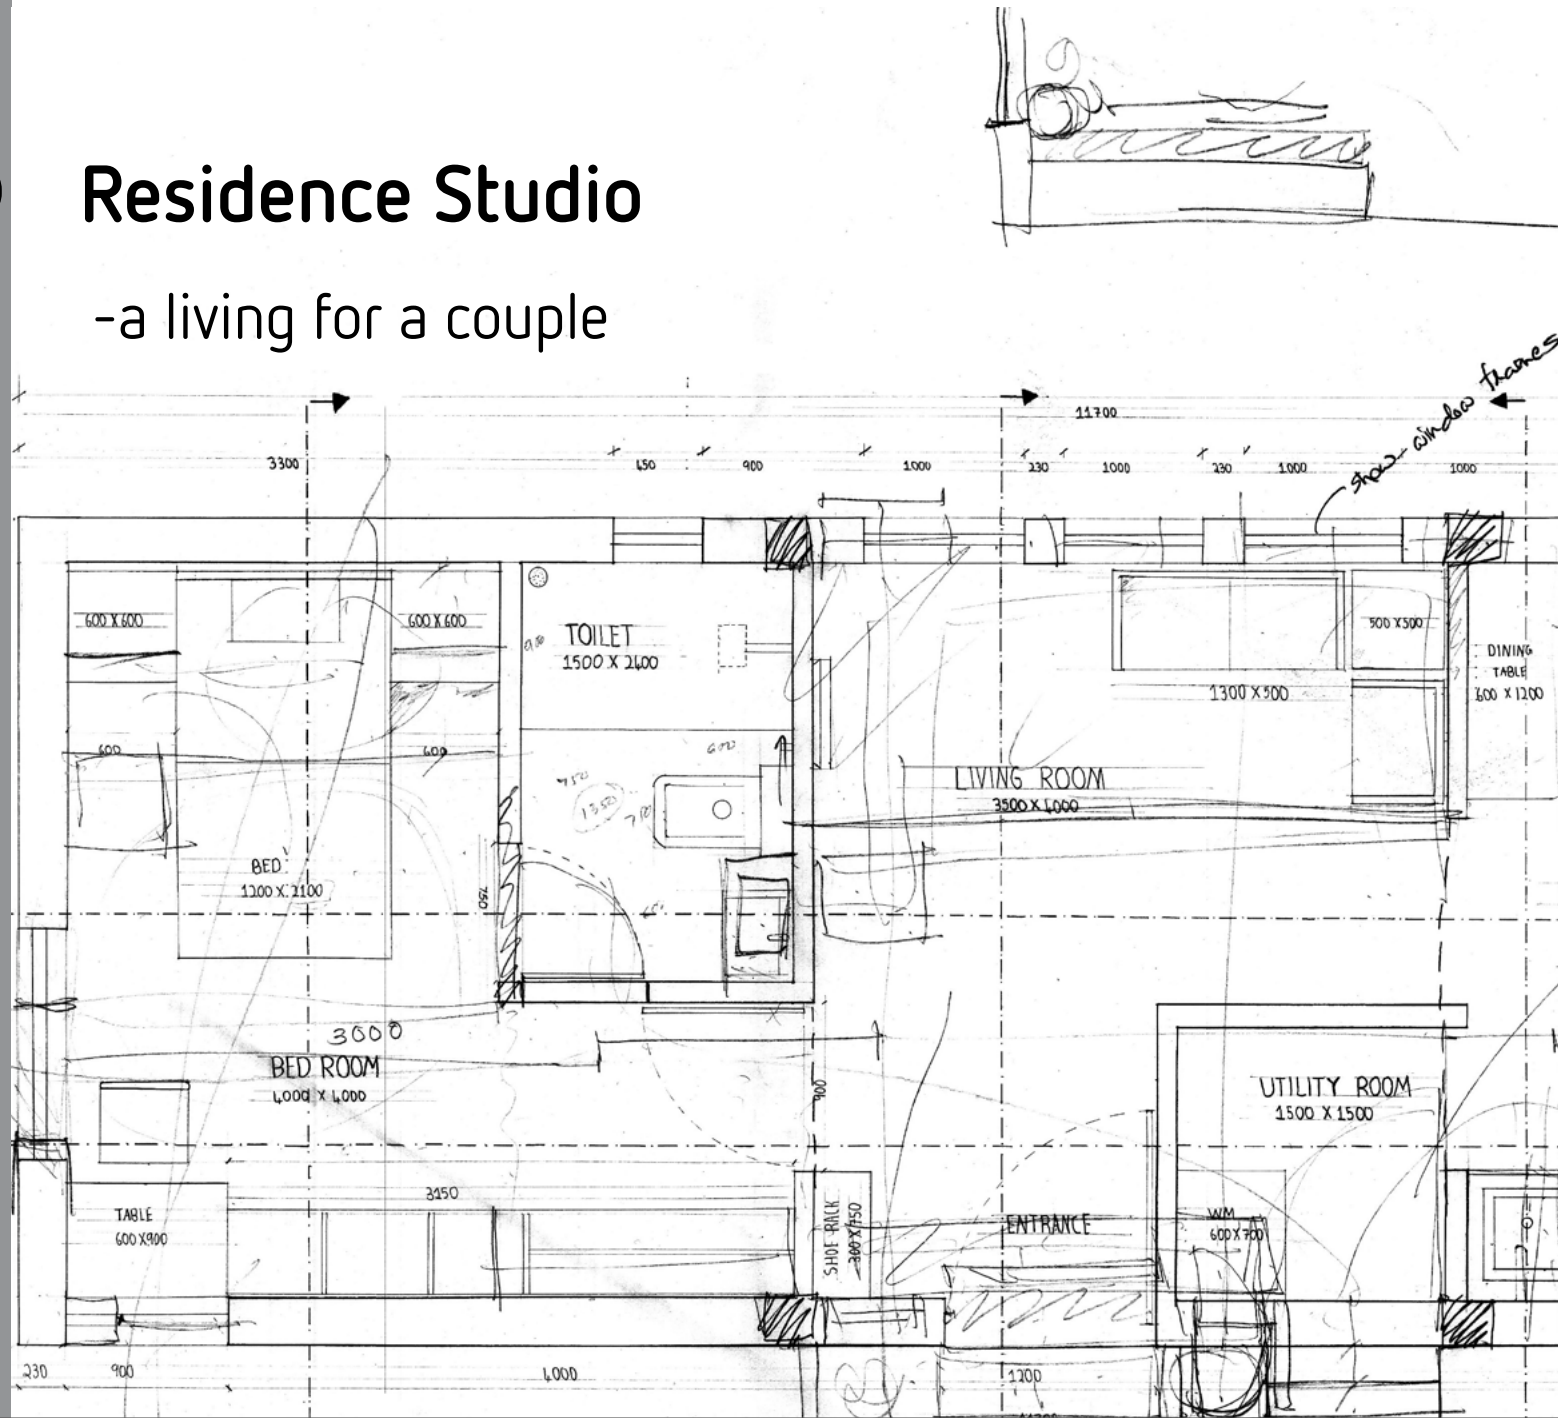

Layering plenty of lighting throughout the room, by paying special attention to natural light by giving big windows in bedrooms and living area that help the natural lights to take part in the design

Residence Studio

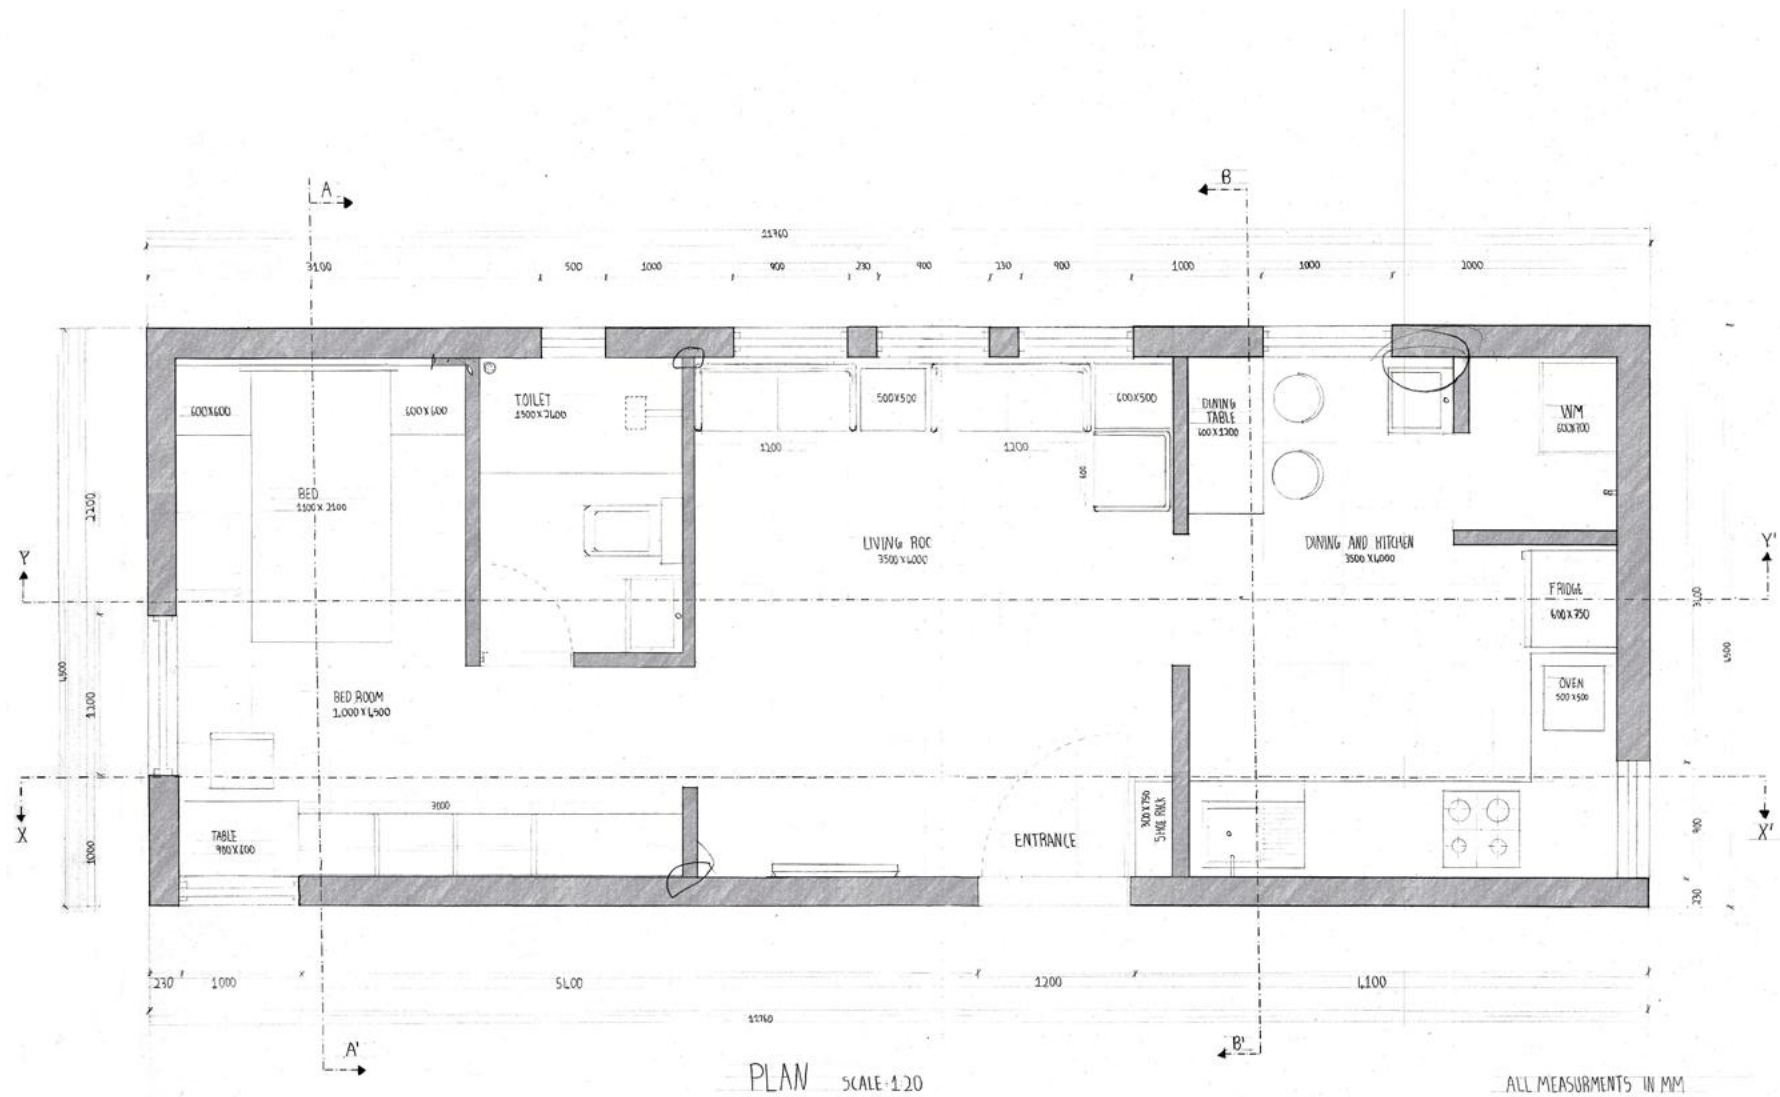

-a living for a couple

This space planning studio focused on designing a residence for a Family with a form that we can decide. The core intension is to understand the transformation of spaces and to understand the basic space planning with human anthropometry and to understand the cultural, physical and emotional needs of an entire family

06 Furniture Design

BThis Studio through exercises and designing attempt to understand the relationship of form, material and development of dimensions in the design of furniture with reference to space
A critical understanding of the evolution of forms in furniture involving these

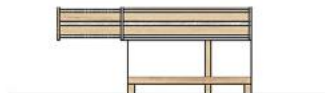

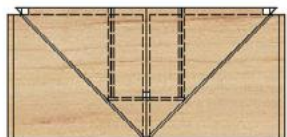

a.Furniture Design

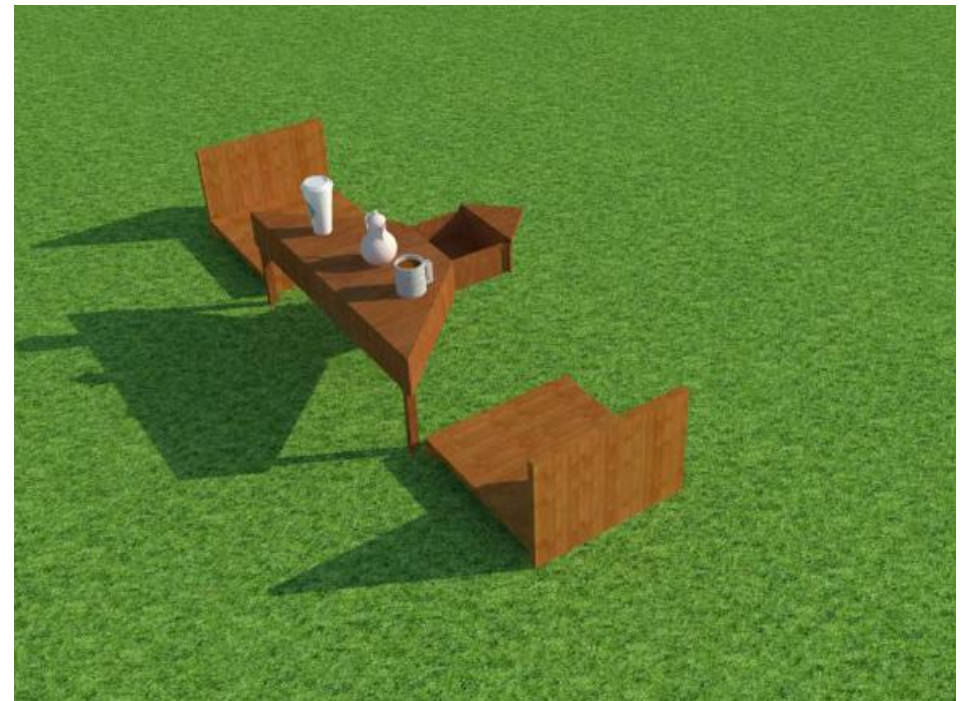

Low seating Coffee table

Design Development

Designing a coffee table out of a triangular shape was a challenge. From a triangular shape to a coffee table with storage space. Adding three triangle with seating and coffee table. Inspired from the low height japanese seating this furniture has been made low height

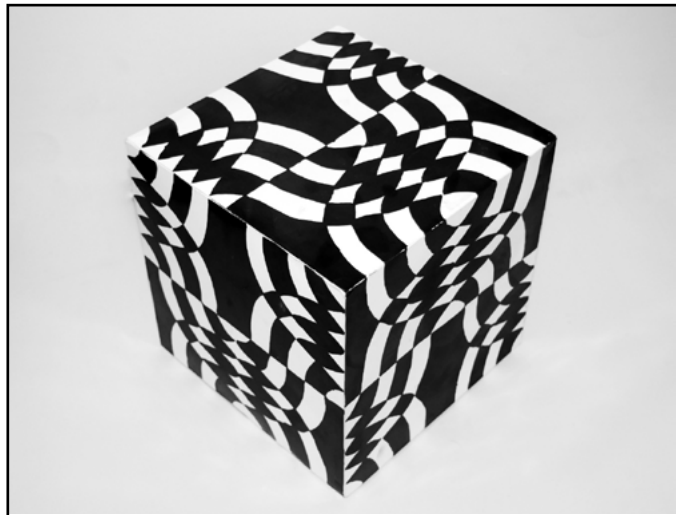

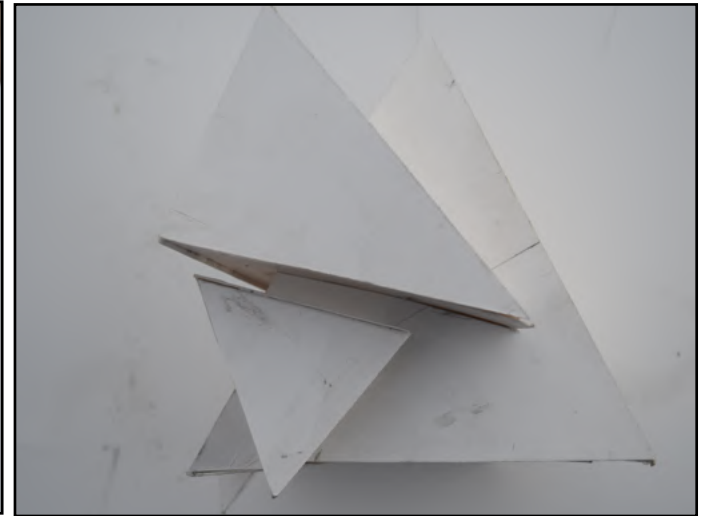

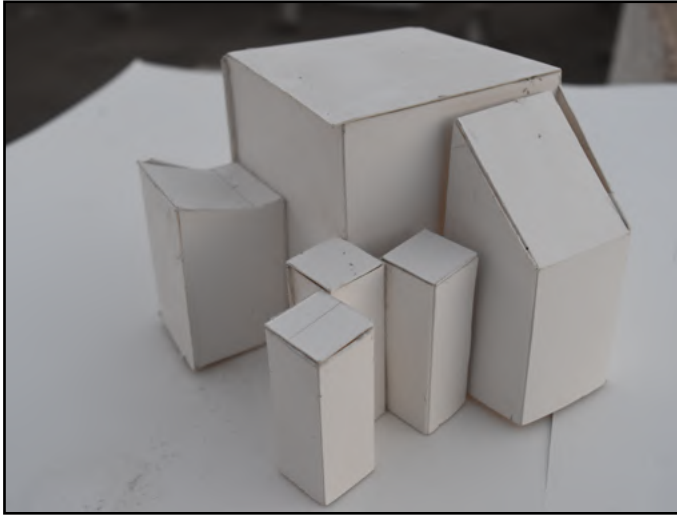

07

Basic Design

Basic design was a great platform for a creative input for making graphics out of the magazine cut-outs, Model making, Spatial organization through circle square and triangle and making composition through that shape compositions with different lines and platform
